

XLerate Program

Up to \$15 Million in project funding available

Receive funding and comprehensive support for large-scale energy efficiency projects through a streamlined pay-for-performance initiative.

KEY BENEFITS

Accelerate Efficiency

Reduce energy use and lower operating costs.

Flexible Support

Funding and guidance is tailored to your facility's specific energy needs and timeline.

Increase Profitability

Improve your bottom line with significant long-term cost savings and enhanced system performance.

Expert Collaboration

Work with experts every step of the way, from project initiation to verification.

Boost Competitiveness

Modernize your operations and strengthen your organization's position as an industry leader in energy performance.

WHAT'S AVAILABLE

Funding for large-scale, complex energy efficiency projects for Ontario's industrial, municipal, institutional and healthcare sectors.

Lower thresholds for projects that will deliver a minimum 600 MWh of energy savings.

Project Incentives of \$300/MWh (or \$450/MWh in constrained regions) to cover up to 75% of eligible project costs capped at \$15 million.

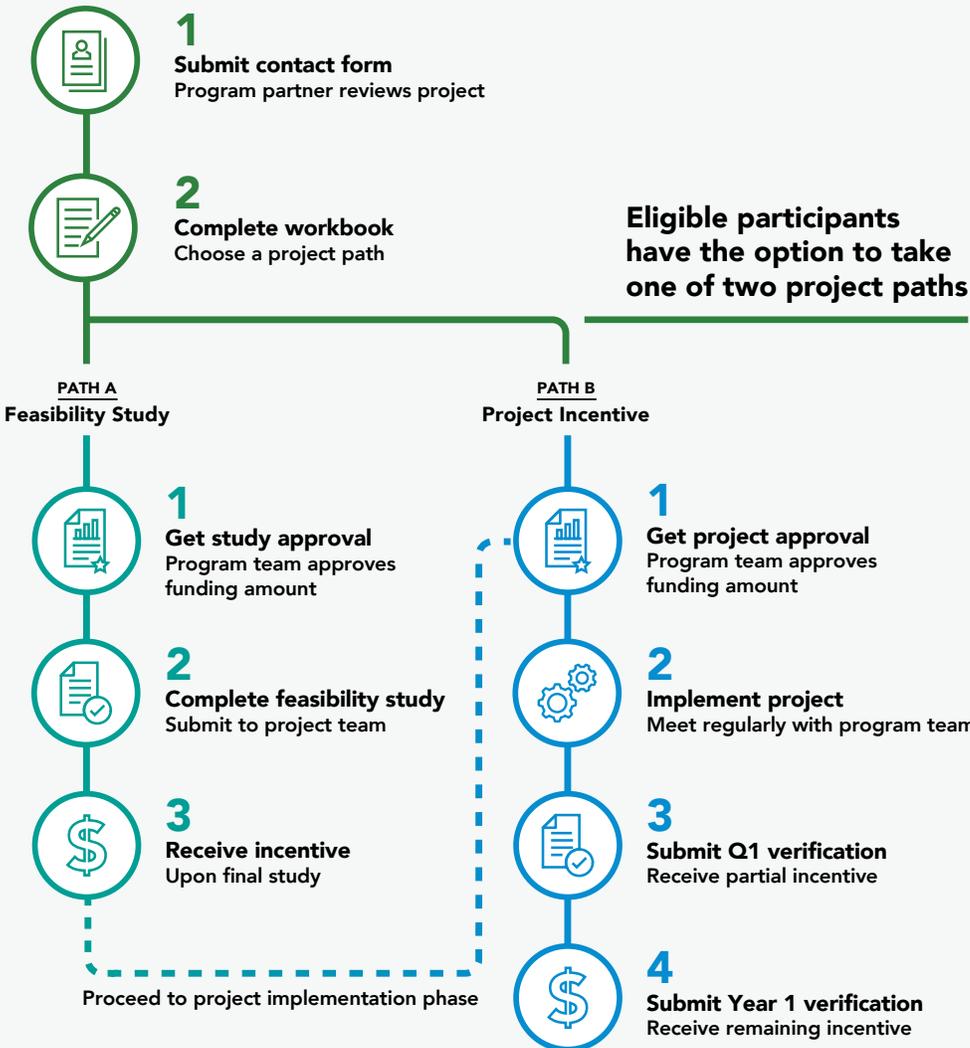

Project Incentives of \$300/MWh (or \$450/MWh in constrained regions) to cover up to 75% of eligible \$15 million per project.

Comprehensive support services to guide participants from initial scoping through implementation and measurement & verification (M&V).

How the XLerate program works

WHO IS ELIGIBLE

Participants must be located in Ontario and:

- Be owners and/or operators of a non-residential facility, or
- Third-party applicants with the authority to implement a project at a non-residential facility.

Projects must:

- Involve an energy-efficiency improvement applied to, or in support of, an industrial process.
- Propose a minimum electricity savings of 600 MWh per year.
- Use technology that is commercially available and not excluded by the program eligibility rules.
- Be completed within 5 years of the execution date of the Participant Agreement.
